

Total Solar Eclipse

by Sparky

On March 29, 2006, a total solar eclipse occurred. It was the first solar eclipse since 2003, which was only seen in Antarctica. People from Europe to Mongolia could see this year's amazing eclipse.

Children, adults and scientists gathered with their sun glasses, mirrors, and telescopes to see this phenomenal event. People gathered on beaches, streets, balconies and rooftops, and tourists gathered from all over the world to see this event

A total solar eclipse occurs when the moon comes between the earth and the sun, blocking the entire sun from view except for an outside ring called a corona. The eclipse lasted longest in Libya, four minutes and seven seconds.

"It is amazing, the best experience of my life. I never imagined I would see this, it is a wonderful experience," said Jan Jalving, a Dutch visitor to Cape Coast.

Katie's Goodbyes

by Sparky

source: www.msnbc.com

On Wednesday April 5, Katie Couric announced her official resignation as co-host of The Today Show. There have been numerous reports over the past few months about her pondering the idea of leaving the popular morning news show, and now she's finally confirmed it.

Katie Couric, who is leaving a \$20 million contract with The Today Show in May, is going to be a night anchor for CBS News and part of the 60 Minutes crew. Her new contract will pay her "only" \$13 million a year. Katie will replace Bob Schieffer starting in September. She will become the first solo female evening anchor in network news history.

My family always has The Today Show on TV while we get ready for work and school, and I am anxious to find out who will be replacing her.
